## SUMMARY

Aspiring Computer Science professional with a passion for Machine Learning and Fullstack development , looking to leverage my skills and knowledge to contribute to innovative projects.

---

## EXPERIENCE

### AI & ML INTERN - K-AKA Technology Services ,Bengaluru

- Developed a secure Employee Registration and Authentication System using Python Programming, Machine learning algorithm, Flask, OpenCV, Excel for storing the real-world data and Biometric authentication.
- Implemented multi-level authentication like unique userId - password, Biometric, verification code like OTP to ensure robust security.
- Implemented Brute Force Matcher algorithm for biometric verification, enhancing system accuracy and security.

### ML INTERN - Technofly Solutions .Bengaluru

- Developed a machine learning model using Python to predict house price prediction in Bengaluru.
- Implemented Regression algorithms like Linear Regression, Random Forest, Decision tree, using scikit-learn and pandas for data manipulation.
- Evaluated model performance using metrics like RMSE, MAE, R2score and utilized Numpy for numerical computations and matplotlib and seaborn for data visualization.t

### CISCO CCNA INTERN - KGTTI, Bengaluru

- Hands-on experience with routers, switches, and network protocols like TCP/IP, DNS, DHCP.
  - Familiar with cloud computing also had a basic knowledge about AWS.
  - Familiar with router and switching concepts, static routing, understanding of LAN, WAN, and MAN with a hands-on experience.
- 

## EDUCATION

2<sup>nd</sup> Year, BTech in CSE ,UVCE

9.97 CGPA, Diploma in CSE ,Government Polytechnic For Women

---

## SKILLS

- Python Programming
- Java Programming
- Full Stack Development
- HTML & CSS
- Microsoft Word, PowerPoint, Excel
- Adobe Photoshop
- Artificial Intelligence
- Machine Learning
